

ALPHEUS

Austin Data Center

1905 E. 6th Street

World Class, Secure, Reliable, Scalable

The Alpheus Austin Data Center is a unique, world-class data facility strategically positioned east of Austin's central business district. Located at 1905 E. 6th street, it features a multiple carrier Internet backbone, dual backup power supplies, several gigabits of local loop to the Internet, state-of-the-art environmental controls, and numerous security systems.

Alpheus offers a variety of options for customers with needs for secure space, reliable power, scalable connectivity and flexible disaster recovery/business continuity solutions.

Performance & Reliability

A constant supply of power is essential to Alpheus services. The building features dual power service, new 2,000 KVA transformers and a back-up diesel generator. Space is available for additional transformers to accommodate tenant's specific power requirements along with secure pad sites for additional generators.

Dependable

Multiple levels of redundancy ensure maximum reliability and availability. Our world-class network features diverse architecture, our facilities are fully redundant in all critical infrastructure, and our state wide network of data centers ensures your systems will always be online.

Key Features

- ⌘ Fully redundant HVAC system
- ⌘ Dry pipe fire suppression with heat and smoke detection
- ⌘ Industrial grade reinforced floors
- ⌘ 22-foot clear height throughout the facility
- ⌘ Controlled temperature and humidity
- ⌘ 24x7x365 critical monitoring/disaster prevention
- ⌘ 24x7x365 secure access
- ⌘ Hands on support

Flexible Options

Alpheus offers solutions to meet every customer's need including:

- ⌘ Relay racks
- ⌘ Cabinets
- ⌘ Private cages
- ⌘ Private suites
- ⌘ Flexible power Configurations
- ⌘ Connection to over 75 carriers

Alpheus Data Services

Alpheus Data Services is Texas' leading provider of information and communications technology solutions for enterprises and governments alike.

At Alpheus, we bring the experience of a carrier grade network operator to stand behind our services. We believe that any given software application is only as good as the communications network employed to make it consistently available.

Alpheus supplies Texas with:

- :: Data Centers
- :: Connectivity
- :: Colocation
- :: Disaster Recovery

Products & Services

As Texas' leading provider of information and communications technology solutions for business and government, Alpheus Data Services offers you the best of both top tier data centers and resilient fiber optic networking. All of our services are engineered to support the mission critical needs of your IT operations. At Alpheus, we bring the experience of a carrier grade network operator to stand behind our services.

Data Center Services

Alpheus operates best of class data centers on the most extensive deep metro fiber footprint in Texas. We serve the fastest growing markets in the state including Austin, Corpus Christi, Dallas, Ft. Worth, Houston and San Antonio.

Our on-network service delivery model provides a better way to achieve security, reliability, scalability, and value for:

- :: Enterprise applications
- :: Disaster recovery solutions
- :: Database Replication
- :: Websites
- :: Software-as-a-service (SaaS) applications
- :: IT operations infrastructure

A Network of Data Centers

Alpheus Communications is the competitive backbone for Metro Texas, connecting information, people and ideas. Our core product offerings include Hubbed and Point-to-Point Service, at bandwidth speeds ranging from DS-1 to OC-192, Gigabit Ethernet and 10 Gbps Managed Wavelengths. At Alpheus, our goals are to provide the highest-quality bandwidth transport services, maintain a world-class network, and provide extraordinary customer support. We have developed and deployed a state-of-the-art broad band backbone that is both fast and protocol agnostic. Our efficient design enables converged services over a unified, redundant network that we actively monitor 24x7. Our network is colocated in more than 85% of AT&T central offices in the largest cities in Texas (Austin, Dallas, Fort Worth, Houston, San Antonio, and Corpus Christi).

Data Center Facilities

Alpheus Data Services' colocation sites are resilient, top tier data center platforms located across Texas and supported by an Alpheus-owned, fully redundant and highly available fiber optic network. Our centers are located within Texas' largest metros and our extensive fiber network enables any enterprise to exceed their business objectives.
